New vehicle/TCU type

When it comes to project on connected car development, there is a large number of stakeholders and tasks like selection of Mobile Network Operator as well as coordination with various distributors and service vendors in addition to compliance with regulations. We work with customers to coordinate schedules with overseas vendors and negotiate with distributors. We also support timelines and gate coordination with off-board development.

Examples

- ✓ Overseas vendor management
- ✓ Connected car development support and regulatory support for Europe and the US
- ✓ Support for the selection of MNOs for connected cars for Oceania.
- ✓ Support for e-call development for new connected cars
- ✓ Call center start-up support
